

INFORMATION SECURITY MANAGEMENT PROFESSIONAL TRAINING

Training and IS Mgmt Professional Exam (a 3-day-online-seminar)

About Information Security:

Information security is increasingly becoming the focus of public and law. Lots of spectacular cases in the press and high fines illustrate the explosive nature of a lack of information security. According to the IT Security Act major utilities have to establish an information security management system. ISO 27.000 is the internationally recognized standard for information security and provides a comprehensible framework for establishing information security in an organization in a way that can be externally certified, thus creating trust among customers and other interested parties.

Training goals:

In this training you will expand your basic knowledge in the field of information security and gain the necessary practical knowledge to be able to assist in the establishment, maintenance, control and improvement of an information security management system (ISMS). You will learn how to set up an effective and efficient risk management. Besides, you will gain insight into different perspectives as well as different control areas of information security.

Target groups:

- Everyone who is involved in the implementation, evaluation and reporting of an information security program, such as an Information Security Manager (ISM), Information Security Officer (ISO) or a Line Manager, Process Manager or Project Manager with security responsibilities
- IT Consultants
- Everyone who is interested in that topic and has basic knowledge (IS Foundation Level)

Training content:

- ISO/IEC 27000-series
 - ISO/IEC 27001: ISMS requirements
 - ISO/IEC 27002: Code of practice
- Information Security Perspectives
 - Business interest of information security
 - Customer perspective on governance
 - Supplier responsibilities in security assurance
- Risk Management
 - Principles of risk management
 - Risk control and dealing with remaining risks
- Information Security Controls
 - Control and control objectives according to ISO/IEC 27002
 - Organizational controls
 - Technical controls
 - Physical, employment-related and continuity controls

Implementation:

- 3-day-seminar (virtual seminar) in English
- Accredited trainer
- Management professional exam after the training (online proctored exam by EXIN)
- Seminar documents to reinforce the seminar content and as a reference book for practical use
